

A high speed broadband data solution with symmetrical download and upload speed of up to 1.54 Mbps (subject to the number of voice calls in progress), along with up to fifteen phone lines.

As one of the fastest growing telecommunications providers, Datavo offers complete data and voice solutions for small and medium-sized businesses. Our customized packages were designed to deliver the high level of services previously available only to big businesses with a comprehensive phone system.

We own and operate our network facilities and equipment, which eliminates the high cost often associated with resold network and services.

No Risk, Guaranteed. We're confident in our service offerings. Datavo offers a 60-day no hassle guarantee. If you're not satisfied with our services within the first 60 days, we will gladly release you from any contractual agreement with no questions asked.

Seamless Conversion. You will keep all the same phone numbers and features you have today. The only changes you will notice are the lower cost, higher Internet speed, and exceptional service.

Affordable Pricing. You pay one affordable price for all the telecommunication services you need - all on one easy to understand bill, one number to call for answers.

“Datavo was able to provide us with a cost-effective T-1 connection that allowed our company to be back on the information highway. Our DSL service was too slow for us to work effectively as we were too far away from the AT&T central office in our area. - CULVER CITY ROOFING”

DATAVO FACTS

- Privately owned corporation based in Los Angeles, California.
- Parent company, Pacific Centrex Services, was founded in 1996.
- \$36 M in annual revenues.
- Over 50,000 active phone lines.
- Serving over 170 central offices throughout California.
- Full array of voice and data services delivered on it's own network facilities and equipment.
- Unparallel customer service.

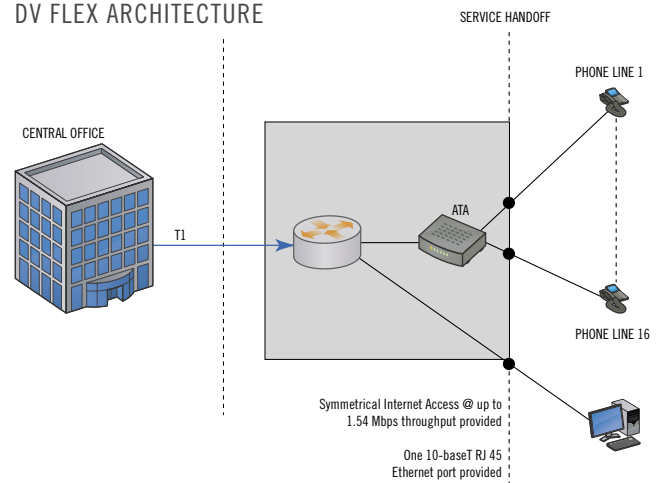

DV FLEX PLUS

DV Flex Plus has been designed with reliability in mind. Its services are provided over time-tested, reliable T1s.

Our T1 is conditioned to allow our DV Flex Plus service to be provided with performance that is not subject to distance limitations or impairment.

Our voice services are provided over a dedicated access network - not over the Internet - and are uncompressed for best voice quality (Mean Opinion Score of 4.5 out of a maximum of 5). Since voice calls are transported over a dedicated network and not over the Internet, they are safe from potential tampering. Additionally, calls are not subject to the impairment normally associated with simultaneous data transmission, all lines can be used for voice, fax or data transmission.

DV FLEX ARCHITECTURE

Datavo maintains a dedicated network connecting to 911 centers in all of its service areas. As a result, customers have access to 911 services at their DV location at all times.

Included In Your DV Office Package

Voice & Data	All packages include up to sixteen voice lines and high speed internet access.
High Speed T1 Internet Access	Symmetrical download and upload speed of up to 1.54 Mbps.
Local Calling	Unlimited local calling included in all DV Flex Plus plans.
On-Net Calls	Calls made to other Datavo customers are free.
Long Distance Minutes	200 minutes/line/month included in plans.
Features	Includes all existing features on your lines at the time of conversion.

Options: You may add voice mail, toll-free number, unlimited long distance calling and other feature at additional monthly charges, if necessary.

Once you have experienced Datavo, you will realize that it is the only company you need for your telecommunications needs. Speak with one of our sales professionals to discuss how our flexible voice and data plans can help you reduce the cost of running your business while achieving higher efficiency.
